Errors	Amount
3704 structured data items are invalid **About this issue:** This issue is triggered if structured data items contain fields that do not meet Google's guidelines. Implementing and maintaining your structured data correctly is important if you want to get an edge over your competitors in search results. If your website markup has errors, crawlers will not be able to properly understand it, and you may run the risk of losing the chance of gaining rich snippets and getting more favorable rankings. For more information on the structured data requirements, see schema.org, Google documentation, or our article. **How to fix:** Check structured data on your webpages with a validation tool. Please note that different markup testing tools may show different results. We recommend that you use the Rich Results Test tool to review and validate your pages' structured data against their rich snippet requirements.	3.7K ↑1.53K
4 pages have duplicate meta descriptions **About this issue:** Our crawler reports pages that have duplicate meta descriptions only if they are exact matches. A <meta description> tag is a short summary of a webpage's content that helps search engines understand what the page is about and can be shown to users in search results. Duplicate meta descriptions on different pages mean a lost opportunity to use more relevant keywords. Also, duplicate meta descriptions make it difficult for search engines and users to differentiate between different webpages. It is better to have no meta description at all than to have a duplicate one. **How to fix:** Provide a unique, relevant meta description for each of your webpages. For information on how to create effective meta descriptions, please see this Google article. You can also view the On-Page SEO Basics: Meta Descriptions article	4 0

Warnings

Project name: www.diginexastore.com

Warnings	Amount
65 pages have a low word count **About this issue:** This issue is triggered if the number of words on your webpage is less than 200. The amount of text placed on your webpage is a quality signal to search engines. Search engines prefer to provide as much information to users as possible, so pages with longer content tend to be placed higher in search results, as opposed to those with lower word counts. For more information, please view this video **How to fix:** Improve your on-page content and be sure to include more than 200 meaningful words.	65 0
0 external links are broken	0 0

Notices

Project name: www.diginexastore.com

Notices	Amount
3542 pages have only one incoming internal link **About this issue:** Having few incoming internal links means little to no visits or chances of being placed in search results. **How to fix:** Add more incoming internal links to pages with important content.	3.54K 0
861 orphaned pages in sitemaps **About this issue:** An orphaned page is a webpage that is not linked to internally. Including orphaned pages in your sitemap.xml files is considered to be a bad practice, as these pages will be crawled by search engines. Crawling outdated orphaned pages will waste your crawl budget. If an orphaned page in your sitemap.xml file has valuable content, we recommend that you link to it internally. **How to fix:** Review all orphaned pages in your sitemap.xml files and do either of the following: - If a page is no longer needed, remove it - If a page has valuable content and brings traffic to your website, link to it from another page on your website - If a page serves a specific need and requires no internal linking, leave it as is	861 0
474 pages require content optimization **About this issue:** Content optimization enhances on-page clarity, improves user engagement, snippet eligibility, and topical authority. It's especially important for pages with a lot of content. **How to fix:** - Follow the advice provided in the error details for each page. - Improve your content with AI using the Content Optimizer tool.	474 0

Detailed Issue: Errors

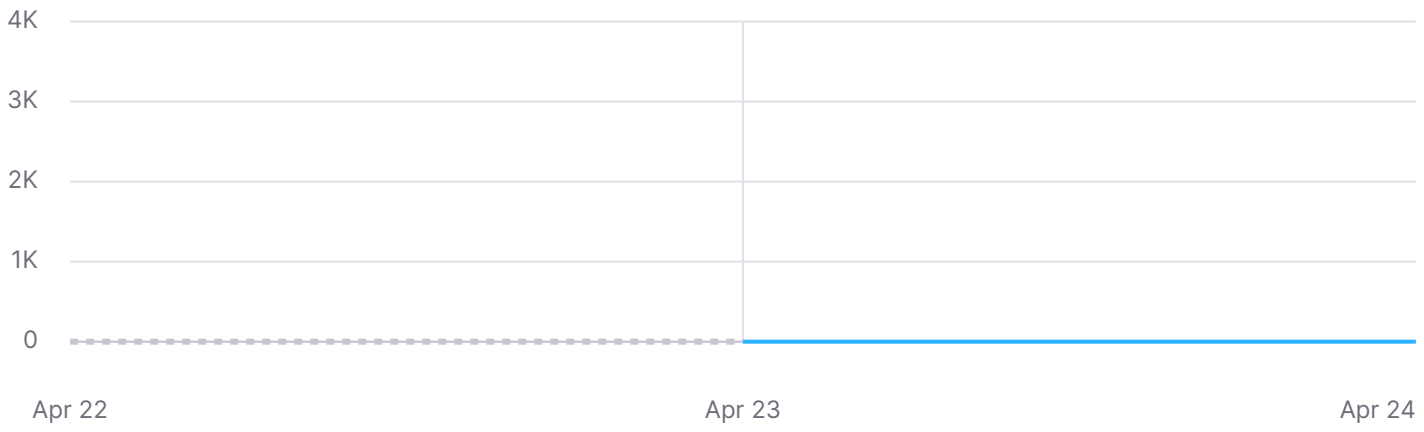
Detailed Errors

Invalid structured data items

Project name: www.diginexastore.com

Detailed Issue Description

About this issue:
This issue is triggered if structured data items contain fields that do not meet Google's guidelines. Implementing and maintaining your structured data correctly is important if you want to get an edge over your competitors in search results.
If your website markup has errors, crawlers will not be able to properly understand it, and you may run the risk of losing the chance of gaining rich snippets and getting more favorable rankings.
For more information on the structured data requirements, see schema.org, Google documentation, or our article.
How to fix:
Check structured data on your webpages with a validation tool. Please note that different markup testing tools may show different results.
We recommend that you use the Rich Results Test tool to review and validate your pages' structured data against their rich snippet requirements.



Only the first 50 rows are shown in reports. To view the full table, export it as a CSV or Excel file from Site Audit.

Duplicate meta descriptions

Detailed Issue Description

About this issue:
Our crawler reports pages that have duplicate meta descriptions only if they are exact matches.
A <meta description> tag is a short summary of a webpage's content that helps search engines understand what the page is about and can be shown to users in search results.
Duplicate meta descriptions on different pages mean a lost opportunity to use more relevant keywords.
Also, duplicate meta descriptions make it difficult for search engines and users to differentiate between different webpages. It is better to have no meta description at all than to have a duplicate one.
How to fix:
Provide a unique, relevant meta description for each of your webpages.
For information on how to create effective meta descriptions, please see this Google article.

Detailed Issue: Warnings

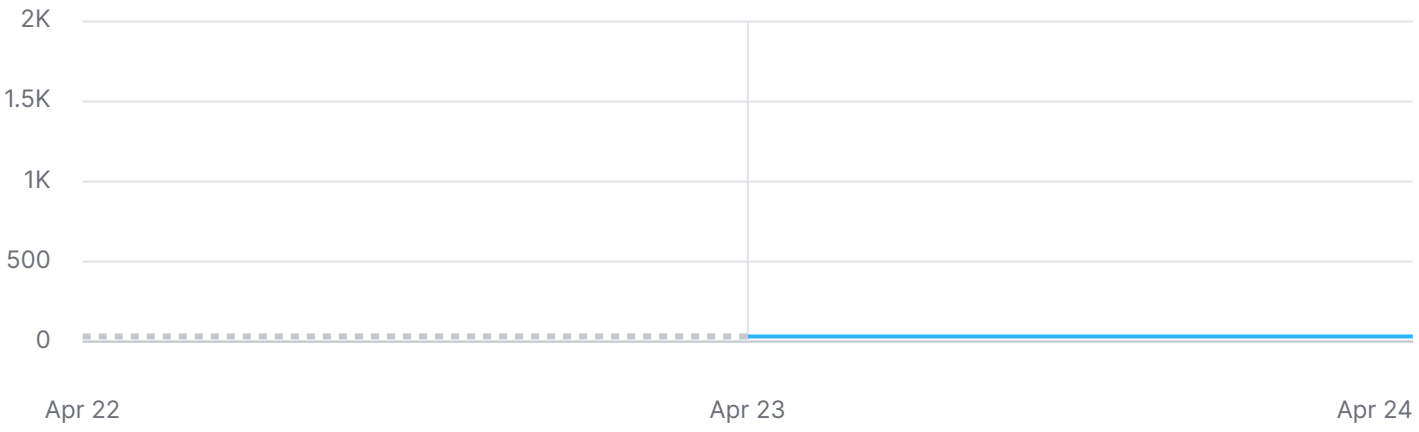
Detailed Warnings

Low word count

Project name: www.diginexastore.com

Detailed Issue Description

About this issue:
This issue is triggered if the number of words on your webpage is less than 200.
The amount of text placed on your webpage is a quality signal to search engines.
Search engines prefer to provide as much information to users as possible, so pages with longer content tend to be placed higher in search results, as opposed to those with lower word counts.
For more information, please view this video
How to fix:
Improve your on-page content and be sure to include more than 200 meaningful words.



Only the first 50 rows are shown in reports. To view the full table, export it as a CSV or Excel file from Site Audit.

Detailed Issue: Notices

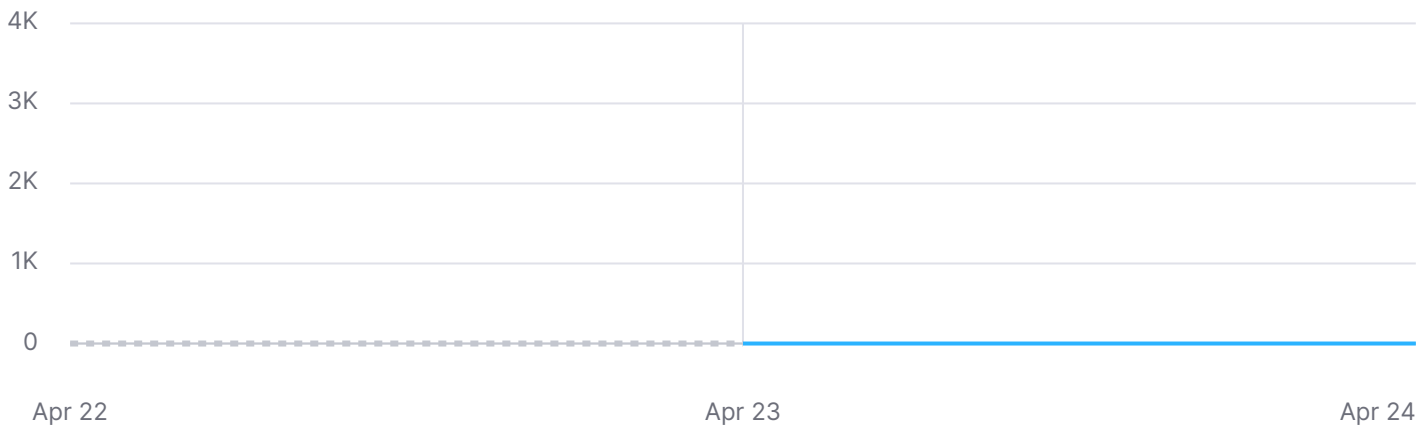
Detailed Notices

Pages with only one internal link

Project name: www.diginexastore.com

Detailed Issue Description

About this issue:
Having few incoming internal links means little to no visits or chances of being placed in search results.
How to fix:
Add more incoming internal links to pages with important content.



Only the first 50 rows are shown in reports. To view the full table, export it as a CSV or Excel file from Site Audit.

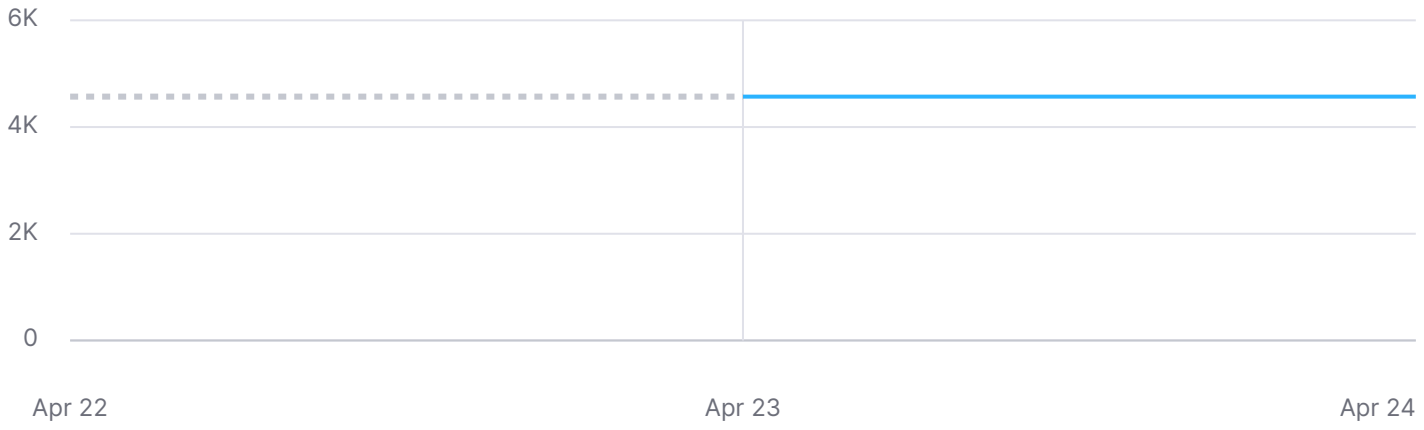
Orphaned sitemap pages

Detailed Issue Description

About this issue:
An orphaned page is a webpage that is not linked to internally. Including orphaned pages in your sitemap.xml files is considered to be a bad practice, as these pages will be crawled by search engines. Crawling outdated orphaned pages will waste your crawl budget. If an orphaned page in your sitemap.xml file has valuable content, we recommend that you link to it internally.
How to fix:
Review all orphaned pages in your sitemap.xml files and do either of the following:
- If a page is no longer needed, remove it
- If a page has valuable content and brings traffic to your website, link to it from another page on your website
- If a page serves a specific need and requires no internal linking, leave it as is



Only the first 50 rows are shown in reports. To view the full table, export it as a CSV or Excel file from Site Audit.

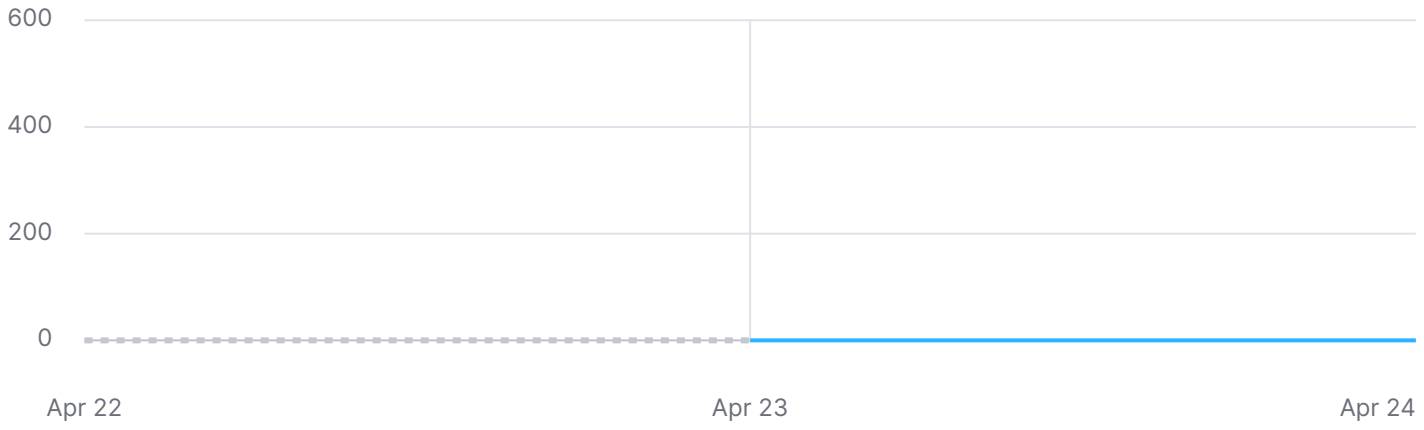
Content not optimized

Detailed Issue Description

About this issue:
Content optimization enhances on-page clarity, improves user engagement, snippet eligibility, and topical authority. It's especially important for pages with a lot of content.
How to fix:
- Follow the advice provided in the error details for each page.
- Improve your content with AI using the Content Optimizer tool.



Only the first 50 rows are shown in reports. To view the full table, export it as a CSV or Excel file from Site Audit.
